

heimatec.Capto™

Modular quick change system for
turning and machining centers

heimatec.Capto™ increases efficiency in set-up and tool changing times for lathes and machining centers

With heimatec.Capto™, heimatec is expanding its product range with a further modular tool quick-change system, which significantly increases the efficiency in set-up and tool changing times. heimatec.Capto™ is extremely flexible and offers a wide modularity as well as a great variety of change-over inserts for lathes and machining centers.

Coromant Capto® is an international widely used modular tool quick-change system that can be utilized in all machine types. The special advantage is the substantial reduction in set-up and tool changing time and greatest tool flexibility.

With heimatec.Capto™, heimatec is expanding its product range with a modular tool quick-change systems. In addition to a wide range of standard tools with capto adaptions, the heimatec.Capto™ program also offers a large number of specific tools designed for machine optimization.

The modular quick-change system heimatec.Capto™ is characterized by a compact design of short overall length, which allows to perform high cutting speeds, while at the same time achieving best surface qualities. The heimatec.Capto™ tool quick-change system is available for Capto sizes C3, C4, C5, C6 and C8.

heimatec.Capto™

- ▶ Easy and fast handling
- ▶ High accuracy and flexibility
- ▶ Flexible with extensive modularity
- ▶ Minimized tooling time
- ▶ Exactly coolant supply through internal coolant solution
